Summary

Offensive security-driven VAPT professional with a strong foundation in **web application and network penetration testing**, focused on delivering **measurable security improvements** for global organizations. Computer Science & Engineering graduate with hands-on experience conducting **black-box and gray-box assessments, deep reconnaissance, attack surface mapping, vulnerability validation, and post-exploitation analysis** using Nmap, Burp Suite (Pro), OWASP ZAP, Metasploit, Nessus, Acunetix, SqlMap, Wireshark, and Kali Linux.

Proficient in identifying and exploiting **OWASP Top 10** and **business logic vulnerabilities**, including SQL injection, XSS (stored, reflected, and DOM-based), CSRF, IDOR, SSRF, authentication bypass, privilege escalation, insecure deserialization, and security misconfigurations across Linux and cloud-hosted environments. Strong understanding of **HTTP protocol internals, session management, firewall rules, network segmentation, and secure architecture principles**. Experienced in producing **CVSS-based risk assessments** and **remediation-focused technical reports** aligned with international standards.

Experience

AI/IT Intern

Estoma Inc. (Japan METI Govt. Internship Program)

Tokyo, Japan
Oct 2025 - Dec 2025

- Worked with **Ruby on Rails, Ruby, Vue.js, Vite, and Docker** in production environments.
- Designed backend architectures including data models, API routing, and scalable logic components.
- Conducted **Vulnerability Assessment and Penetration Testing (VAPT)** on web applications and APIs.

Cybersecurity Specialist Intern

DeshLink Ltd.

Dhaka, Bangladesh
Jul 2023 - Nov 2023

- Performed **penetration testing**, network security audits, and comprehensive security assessments.
- Identified and documented security vulnerabilities with risk-based prioritization.
- Delivered structured **security hardening reports** with actionable remediation recommendations.

Cybersecurity Intern

Senselearner Technologies Pvt. Ltd.

Remote
Sep 2023 - Nov 2023

- Executed **VAPT** activities for enterprise web applications and infrastructure.
- Wrote **cyber awareness guides** and comprehensive security documentation.
- Supported **threat intelligence** operations and continuous vulnerability monitoring initiatives.

Education

B.Sc. in Computer Science & Engineering (CGPA: 3.81/4.00)
American International University-Bangladesh (AIUB)

Dhaka, Bangladesh
Apr 2025

- **Dean's Honorable Mention (3×)** - Recognized for academic excellence
- **Academic Scholarship Recipient** - Merit-based scholarship award
- **Thesis:** Hybrid Approach Towards Modernizing Efficient Vehicular Networks
- Graduated with Honors: **Magna Cum Laude (Academic Honor)**

Skills

Cybersecurity & VAPT

Vulnerability Assessment, Penetration Testing, OWASP WSTG 4.2, OWASP API Top 10, MITRE CWE, CVSS v3.1, Security Auditing, Threat Intelligence, Risk Assessment

Security Tools

Burp Suite, Nuclei, Nmap, Metasploit, Nessus, Wireshark, SQLMap, Katana, Dirsearch, Gobuster, OWASP ZAP, OpenVAS

Programming & Scripting

Python, Ruby, PHP, JavaScript, C++, Java, C#, Bash

Web & Frameworks

Ruby on Rails, Next.js, FastAPI, Vue.js, React, Node.js, HTML/CSS, REST APIs

Databases & Systems

MySQL, PostgreSQL, Oracle, Docker, VMware, VirtualBox, Linux, Windows Server

Networking

Cisco Routers/Switches, VLANs, OSPF, NAT, TCP/IP, Network Security, Firewall Configuration

Specializations

Web Application Security, API Security, Network Security, Cloud Security, IoT Security, VANETs, SDN/NFV

Certifications

- **Internship in Japan for AI and Tech Talent** - METI Govt. Japan *December 2025*
- **CCNA** (Course Completion Certificate) - Cisco Networking Academy *October 2025*
- **Practical Ethical Hacking** - Udemy *September 2025*
- **AI-Driven Cybersecurity** - Udemy *September 2025*
- **Cyber Security Internship** - Senselearner Technologies *November 2023*
- **Cyber Security Internship** - University of Dhaka (IIT) *October 2023*
- **Network Support & Security** - Cisco Networking Academy *October 2023*
- **Network Basics** - Cisco Networking Academy *October 2023*

Projects

ReconScience - Automated Web Vulnerability Assessment Platform [🔗 Live Demo](#)

- Engineered a full-stack automated **VAPT platform** with **Next.js** frontend and **FastAPI** backend, deployed on Railway.
- Integrated **Nuclei** security scanner with 4 scan modes (Quick, Full, Network, Custom) covering CVEs, misconfigurations, XSS, SQLi, and subdomain takeovers.
- Implemented **real-time scan streaming** using Server-Sent Events (SSE) with live terminal-style progress visualization.
- Built **JWT-based authentication**, per-user scan history with **PostgreSQL**, and exportable security reports with **OWASP Top 10** mapping.
- Designed a premium dark-mode UI with risk scoring dashboard, severity breakdown, header analysis, and technology fingerprinting panels.

OWASP-Aligned Web & API Penetration Testing of Multi-Tenant SaaS Platform [🔗 Project Link](#)

- Conducted full-scope authenticated and unauthenticated **VAPT** on a multi-tenant web application (Vue.js frontend, Ruby on Rails backend, Auth0-based authentication).
- Performed comprehensive testing aligned with **OWASP WSTG 4.2**, **OWASP API Top 10 (2019)**, **MITRE CWE**, and **CVSS v3.1** frameworks.
- Identified **22 security findings** across severity levels: 2 Critical, 7 High, 7 Medium, 3 Low, 3 Informational.
- Discovered critical vulnerabilities including weak JWT revocation logic, exposed debug console, IDOR in API endpoints, and CORS misconfiguration.
- Conducted reconnaissance and endpoint enumeration using **Nuclei**, **Katana**, **Dirsearch**, **Gobuster**, and manual API fuzzing.
- Provided structured remediation recommendations with prioritized risk-based classification and implementation guidance.

VAPT Project - Security Audit & Testing [🔗 Project Link](#)

- Performed comprehensive vulnerability assessment following **OWASP** and **NIST** security testing methodologies.
- Identified critical security issues including insecure authentication mechanisms, broken access control, and server misconfigurations.
- Delivered detailed **remediation report** with risk scoring, exploitation scenarios, and mitigation strategies.

Elite Depot - E-Commerce Platform [🔗 Project Link](#)

- Developed secure **PHP-MySQL** e-commerce system with input validation and prepared statements to prevent SQL injection.
- Implemented comprehensive admin dashboard, inventory management, and order processing workflows.
- Designed scalable normalized relational database schema with proper indexing and query optimization.

Study Assist - Streamlined Study Center Management [🔗 Project Link](#)

- Built a **C# desktop application** with Windows Forms for comprehensive educational center automation.
- Implemented modules for **staff management**, **attendance tracking**, **payroll processing**, and automated reporting.
- Designed interactive dashboards displaying **real-time insights** and analytics for administrative decision-making.

Course Management System - Smart Course Automation [🔗 Project Link](#)

- Developed modular **Java OOP** system demonstrating design patterns and software engineering best practices.
- Implemented core OOP principles: abstraction, inheritance, interfaces, encapsulation, and polymorphism.
- Added persistent **file I/O logging** system for data persistence and audit trail functionality.
